### Configuration

The main extension's settings can be found under STORES → Configuration → Mavenbird → Product Attachments.

General

Enable Module <small>[store view]</small>	Yes	▼
Add Category Files to Products <small>[store view]</small>	Yes	▼ ?
Display `Include In Order` Files on Product Pages and Widgets <small>[store view]</small>	No	▼
Url Creation Type <small>[store view]</small>	Id	▼

ID type URL: <http://domain.zone/file/download/file/22>. Hash type URL:  
<http://domain.zone/file/download/file/8a9e07bad0166438b0b64a91b235ca4e>

- **Enable Module:** This setting allows you to enable or disable the Product Attachment module. When enabled, the module will be active and the configured functionality will be available on your store.
- **Add Category Files to Products:** This setting determines whether files attached to product categories should also be automatically attached to the products within those categories. This can be useful if you want to provide additional resources or documentation related to a category of products.
- **Display `Include In Order` Files on Product Pages and Widgets:** This setting controls the display of files that are marked as `Include In Order` on the product pages and widgets. Files marked as `Include In Order` are those that you want to make readily accessible to customers, such as manuals, warranty information, or additional product details.
- **URL Creation Type:** This setting determines how URLs for attached files are created and displayed. This affects the way links to the files are generated and how they appear in the store.

**Show File Size**  
[store view] Yes ▼

- **Show Attachments:** This setting determines whether attachments associated with products are displayed on the product page.
- **Title for Attachments Block:** Allows customization of the title displayed above the attachments block on the product page.
- **Type of Attachments to Display:** Specifies the types of files (e.g., PDFs, images) that will be shown as attachments on the product page.
- **Order Status:** Defines the order status(es) at which attachments are visible on the product page, such as "Pending" or "Completed".
- **Show File Icon:** Determines whether icons representing file types (e.g., PDF icon, image thumbnail) are displayed alongside attachment links.
- **Show File Size:** Controls whether the size of attached files is displayed next to their respective links on the product page.

### Order Email

Add Attachments to Transactional Emails  
[store view]

No

### Additional Settings

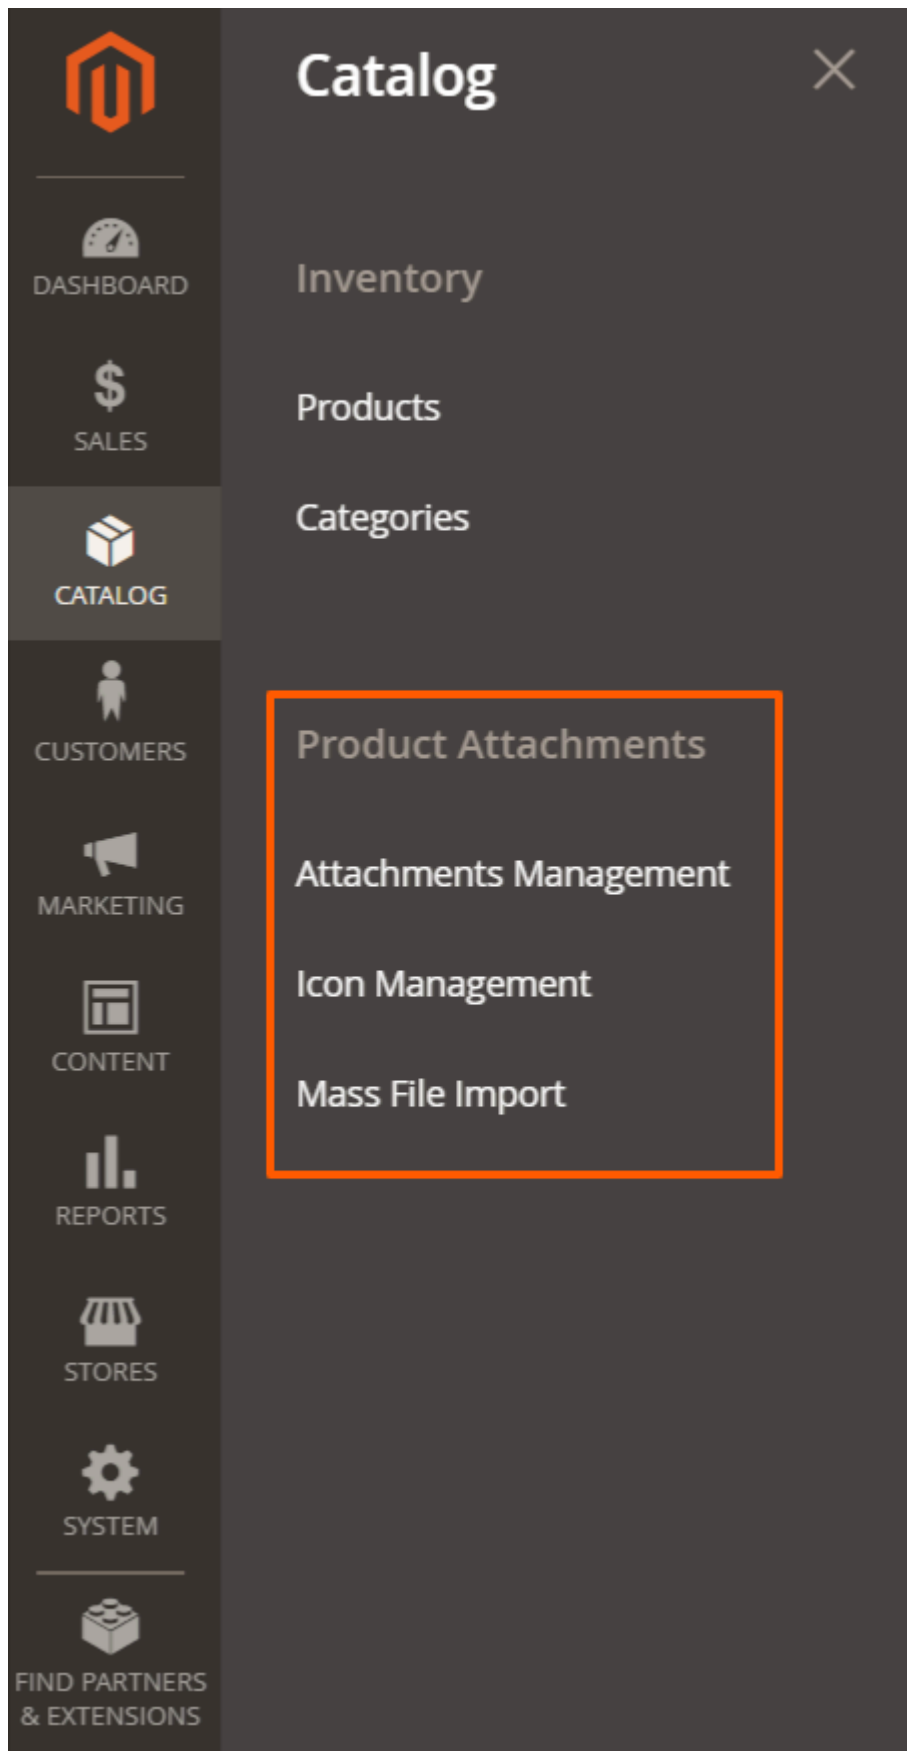

Autodetect File Mime Type on Download  
[store view]

Yes

Set the option to Yes to let customers open attachments in a new browser window instead of downloading them. 'FileInfo' extension or 'mime\_content\_type' function must be enabled in server configuration

- **Add Attachments to Transactional Emails:** This feature allows administrators to attach files to transactional emails sent from the store, such as order confirmations or shipment notifications. It enhances communication by including relevant documents like invoices, manuals, or promotional material directly in the email.
- **Auto Detect File Mime Type on Download:** This functionality automatically identifies the file type (MIME type) of attachments when users download them. It ensures that users receive files in their correct formats without manual intervention, improving convenience and usability in accessing attached documents.

### Attachment Management

To check or modify file downloads sections, go to **CATALOG** → **ProductAttachment** → **Attachments Management**.

In this section, the store owner can manage all the attachments:

- **ID:** Unique identifier for each attachment.
- **Icon:** Visual representation (icon) of the attachment type.
- **Attachment Type:** The type of attachment (e.g., image, document).
- **File Name:** Name of the attached file.
- **File Label:** Descriptive label for the file.
- **Mime Type:** MIME type of the file.
- **File Size:** Size of the file.
- **Created At:** Date and time when the attachment was created.
- **Updated At:** Date and time when the attachment was last updated.
- **Action:** Actions you can perform on the attachment (e.g., edit, delete).

Upload Your Files

Prepare Files For Import Select Stores For Configuration Import Your Files

Cancel Back Next

Prepare Files

You can upload your files in `pub/media/mavenbird/file/import/ftp` folder

Add New Files

To check the structure of the CSV document, click the **Export** button or the **Download Example CSV**.

You have to download export sections then you have to edit in file then import a changes file to import sections.

**Upload Location:** Ensure your files are placed in the directory `pub/media/mavenbird/file/import/ftp`.

**Add New Files:** Click on the "Add New Files" button to select and upload files from your local system to the specified

**Store Selection:** In the next step, choose the stores where the import configuration will be applied. This helps in specifying different settings for different stores if required.

**Start Import Process:** After selecting the stores, proceed to the final step where you can initiate the import process.

## Product Attachment Extension for Magento2 by Mavenbird

**Review and Confirm:** Ensure all files are correctly uploaded and configurations are set before confirming the import.

**File Format:** Verify that the files you are uploading are in the correct format required for the import process.

**File Naming:** Use clear and descriptive names for your files to easily identify them during the import process.

## Frontend Product Attachment

On the frontend side you can see the Product Downloads tab, in this tab you can see the testing section is there and in this section Test attachment is attached so you can click on this button then you have downloaded the attachment.

The screenshot displays the LUMA product page for 'MARY PLATINUE. Face soap.' The page includes a search bar, a breadcrumb trail (Home > Skincare > MARY PLATINUE. Face soap.), and a product image placeholder. The product price is \$100.00, and it is marked as 'IN STOCK' with SKU# 9570007000019. Below the product details, there is a 'Product Attachments' tab with three attachments: '210320170503\_SRFD\_Side\_Building\_R1\_For\_Website\_21 (418.50 kB)', 'logo (20.29 kB)', and 'PDF (133.20 kB)'.
